

VARA Physical Movement Assessment Project

VARA, in collaboration with GMVS, SMS and KMS, will be hosting 3 physical movement assessment days August through September. The assessment projects are for ages U14-U16 for the 2018 season.

Purpose: The purpose of the VARA assessment project is to provide participants with appropriate feedback on their functional movement and fitness levels. The focus for attending coaches is to provide insight on movement assessments, simple correction exercises, and training ideas to improve movement or overall athletics and to highlight the benefits of proper movement in athletic youth development.

The focus of the content will be placed on quality of movement for athletics. Each attendee will be individually assessed while in a fun group setting.

There will be an *educational component* for coaches in the form of familiarization with movement assessments and coaches will learn ways to implement assessments into their club training environment.

***VARA thanks the three sites involved for hosting the assessments and for the expertise of the leaders involved. We look forward to branching out to more sites in the future. Many thanks to Booster for sponsoring the events.*
