How the Shootout works:

- 2 racers race their 1st run head to head and they will be released from the start at the same time.

- The clock starts when the 1st racer crosses the finish line and stops when the 2nd racer crosses the finish line. This is called the differential.

- The same 2 racers go back up and switch courses and do the same thing on the 2nd run

- The racer with the largest differential is eliminated and the winner moves on to the next round.

Example: Sue and Kim race the 1st head to head run and Kim crosses the finish line 1st and Sue crosses .50 sec later. Sue is behind by .50 sec going into the 2nd run.

- Sue and Kim go back up and switch courses and do their 2nd head to head run. Sue crosses the finish line 1st and Kim crosses .75 later. Sue has made up the differential by .25 and moves on.

The maximum differential is 1.5 sec.

Another good rule to know is:

If you fall on the first run of a round you are given a 1.5 second penalty. If you fall on the second run you lose the round. So, if Kim and Sue are dueling and Kim DNF's first run she is given a 1.5 second penalty. In the second run if Sue DNF's, Kim moves on.
