

Suggestions for the Tuning Kit

The items below are Swix products. There are other companies offering tuning products and wax. The choice is yours. Tuning supplies, wax and equipment can be found at local retail ski shops and or in catalogs. Contact your local ski shop for more info and to answer questions about tuning tools.

***Some companies offer a starter kit containing all the basic essentials, ready to go.**

Economy Diamond Stone Line

Rectangular Horsehair

TO1588
TO1618
TO1578

Wax.....Base Prep BP88 180g
Use on new skis, and for travel.

BP088-180

Wax Training/Race
CH5 Temp 7F to 18F
A race wax alone, easy to apply & strong durability.

CH05X-60g

CH6 Temp 10F To 25F GO LIQUID
Will outperform the paraffin, is the best in HIGH HUMIDITY.

CH06XL-120

CH7 TEMP 19F To 28F not humidity sensitive.
Use in a typical NE winter below 32F.

CH07XL-120

I84 a conditioner for race skis.

- Use the Swix I84 to clean the base and then use a 161 brush over the base. Next, wax with the Baseprep for storage.
- A cleaner for Fluoro glide wax & CH wax improves the glide and will condition the base.
- The more wax ironed into the base makes the base faster over time. I84 works also as a glide wax.
- I84 DOES NOT RUIN THE STRUCTURE LIKE HOT WAXING CLEANING.
